

Cinnafilm® is a global leader in innovative video optimization solutions for television, film, and multimedia delivery.

Harnessing modern graphics cards, Cinnafilm's patented, file-based software offers the fastest, highest quality standards transcoding for image processing. We believe Every Frame Matters™.

LEADERSHIP

Lance Maurer
CEO & Co-founder

Chris Gorman
CTO & Co-founder

Ernie Sanchez
COO & Co-founder

FOUNDED

2007

HEADQUARTERS

Albuquerque, New Mexico

INVESTORS

Flywheel Ventures (2012)
& Private Investors

WHAT WE DO

- Standards conversion
- Advanced inverse telecine
- Automatic mixed-mode normalization
- Phase correlation-based motion compensation
- Advanced, high quality de-interlacing
- Removal of composited cadence errors
- Noise and grain removal
- Film grain and texture modeling

HOW TACHYON WORKS

Accelerated beyond real-time barriers by NVIDIA® Tesla™ GPUs and powered by our proprietary video processing engine, Pixel Strings™, Tachyon® creates superlative pre-compression images with an unrivaled ability to smoothly correct problematic frame mechanics. An infinitely scalable investment, Tachyon is the ultimate solution for file-based Standards Transcoding™ requiring automated and unlimited delivery targets. Tachyon is available as an appliance or as a transcoder plugin.

WHO USES TACHYON?
